Sensing the difference.

Whirlpool is proud of the fact that it is the leading major home appliance manufacturer in the world. This is a success born out of relentless research and innovation, consistently producing industry leading design and functionality solutions to satisfy changing needs. New design trends, technological advances, evolutions in society and changes in domestic behaviour have all inspired our innovations. With every step has come greater simplicity, adaptability and durability. This produced cleaner, more attractive styling and more sophisticated and responsive functionality. The result is stylish appliances with the intelligence to do much of the work for you, radically simplifying your existence.

We, at Whirlpool, know your eye for beauty and your desire for a total, co-ordinated look.

That's why we design our appliances with an obsession for detail. Our Fusion, Ambient and all our other design lines share a sleek and modern harmony which is the perfect complement to our state-of-the-art technology.

But we also know you're always looking ahead. That's why our designers imagine today ways you will use your kitchen tomorrow.

A passion for beauty in every detail.

Whirlpool reinforces its support for Habitat for Humanity in its fight against poverty housing.

Whirlpool is strongly committed to increasing its support for Habitat for Humanity. This international charity offers hope to some of the world's poorest people, giving families in deprived areas the chance of a safer, more financially secure future. Whirlpool works in partnership with Habitat for Humanity by donating products and providing manpower for building projects.

Since 2004, Whirlpool EMEA has become Habitat for Humanity's longest standing corporate partner in the region. In 2011, we expanded our partnership to cover 18 countries in Africa and the Middle East, as well as 14 countries in Europe and Central Asia.

To date, we have helped Habitat for Humanity help around 75 800 families in these regions, while over 1 000 Whirlpool employees have donated their time to participate in house builds and renovations. In both 2011 and 2012, we sent 100 employees to contribute in building projects, and in 2013, that number rose to 141. In 2013, those employees worked on four international builds in four countries around Europe (Romania, Hungary, Bulgaria and Poland), as well as three local builds; two in Poland and one in Ireland.

Admire the beauty of
performance.

The difference
between design
and **total design.**

We, at Whirlpool, know your eye for beauty and your desire for a total, coordinated look.

That's why we design our appliances with an obsession for detail. Our Fusion, Absolute and all our other collections share a sleek and modern harmony which is the perfect complement to our state of the art technology.

But we also know you're always looking ahead. That's why our designers imagine today, ways you will use your kitchen tomorrow.

A passion for beauty in every detail.

INNOVATION

The difference between performance and N°1 performance.

We, at Whirlpool, have dedicated over 100 years of experience to offer more advanced **6TH SENSE** technology for maximum results with minimum effort. But what's more important, consumers have tested and rewarded us:

- 1st in launching the CRISP function on the market.
- N°1 in food preservation¹, thanks to our innovative cooling system that guarantees food stays fresh up to 4 times longer.²
- 1st induction oven on the market.
- 1st full set of kitchen appliances treated with iXelium™ that highly resists yellowing and corrosion for over 10 years.³

Whirlpool. 100 years of experience in intuitive technology.

¹ Source: Based on internal tests carried out versus main competitors.

² Compared with Whirlpool total NoFrost refrigerator. Freshness has been calculated as an average taking into account variation of food colour, pH and weight loss measured over a period of time. Time guidelines may vary depending on original food quality.

³ Source: TÜV Rheinland Italy, 1st set iXelium™ by Whirlpool.

INNOVATION

iXelium™

Discover our resistant kitchen set.

10 YEAR
GUARANTEE
AGAINST YELLOWING AND CORROSION
iXelium™
Whirlpool
SENSING THE DIFFERENCE

The iXelium™ full set is the first, best and only set for your kitchen; Whirlpool's unique high scratch-resistant, easy-clean surface stays brilliant over time.

A UNIQUE ELEGANCE THROUGHOUT YOUR KITCHEN

Whirlpool presents a brilliant new set of appliances featuring iXelium™; the patented high technology surface that never loses its shine. Comprising an oven, microwave oven, hob and hood, as well as a warming drawer and coffee machine; the full iXelium™ set of appliances combines outstanding performance and ease of use with the lasting beauty only iXelium™ can offer.

MARKET-LEADING INNOVATION

iXelium™ is only available from Whirlpool. Unlike traditional stainless steel or anti-fingerprint surfaces, this revolutionary material was created by applying an exclusive nanotechnology treatment to stainless steel. The result? A surface that is highly resistant to scratching, incredibly easy to clean and will stay beautiful over time.

SUPERIOR RESISTANCE TO SCRATCHING

In independent tests¹ done on scratch resistance, iXelium™ beat all other surfaces - 17 levels more resistant to scratches than uncoated standard stainless steel.

ALL-ROUND BEAUTY THAT LASTS A LIFETIME

The iXelium™ set of appliances have been designed not only to be durable but to stay beautiful over time. Every inch of every iXelium™ surface is protected by the same unique treatment, so your appliances will still look stunning after many years of use. The iXelium™ set is 11 times more resistant to high temperatures than uncoated stainless steel², thus preventing the yellowing effect. iXelium™ offers an incredibly easy to clean surface that is 2 times easier to clean than uncoated stainless steel² - simply use water.

¹ These tests were carried out at the laboratories of TÜV Rheinland Italia. TÜV Rheinland Italia, a member of the TÜV Rheinland Group has been a global leader in independent safety and quality certification for products, services and corporate systems for over 130 years, with over 300 offices in 60 countries.

² Test performed by TÜV Rheinland Italy.

Discover the new

INNOVATION

power of 6TH SENSE technology.

Your extra power for perfect results, intuitively as never before.

Cooking	Superior Performance	Intuitive Use	Intelligent Saving
	Ovens: cooking results of a master chef; deliciously tender inside, perfectly browned and ideally crispy.	Ovens: the new 6TH SENSE technology and programmer adapts cooking parameters, automatically offering you the best and most intuitive experience.	Ovens: 6TH SENSE technology automatically adjusts the temperature and power that is needed without pre-heat, reducing up to 20% energy and time. ¹
	Microwave: 1 st in launching the CRISP function on the market.	Microwaves: the 6TH SENSE intelligent sensors detect the humidity level of the cavity and adapts the cooking time for perfect results.	
	Hobs: the new 6TH SENSE cooking functions guarantee the right cooking power level for perfect results.	Hobs: easily select one of the special 6TH SENSE functions like melting, boiling and simmering for perfect settings.	Hobs: 6TH SENSE technology allows you to save up to 30% energy ² and 30% time ³ when boiling 2 litres of water.
	Hoods: the ultimate evolution in air purification with maximum energy efficiency.	Hoods: the intelligent 6TH SENSE technology, activated with one touch, automatically adjusts the power of the air circulation.	Hoods: you save up to 50% of energy as you only use the power that is needed for your perfect cooking experience. ⁴
Cooling	Superior Performance	Intuitive Use	Intelligent Saving
	The N°1 in food preservation, no-one preserves better. ⁵	6TH SENSE FreshControl technology senses food and automatically adapts humidity and temperature accordingly, in the whole cavity.	Intelligent food preservation that reduces food waste.
Dishwashing	Superior Performance	Intuitive Use	Intelligent Saving
	The N°1 in cleaning the toughest dirt, effortlessly. ⁶	Simply select the 6TH SENSE PowerClean™ programme and the power jets will adjust the water pressure to the level of dirt. No pre-wash is needed.	With intelligent sensor regulation, save up to 50% of water, energy and time ⁷ by only using what you need to get your dishes perfectly clean, thanks to intelligent sensor regulation.
Washing	Superior Performance	Intuitive Use	Intelligent Saving
	The N°1 in keeping colours bright for longer. ⁸	6TH SENSE technology provides the best care for all your garments. It automatically senses the size of the load and adjusts the washing time accordingly.	Adapt resources to the size of each load and save up to 40% on water, time and energy. ⁹

¹ 20% Maximum saving obtained in tests with various combinations of dishes using "no pre-heat" function compared to using "pre-heat".

² vs. a standard Whirlpool induction hob without **6TH SENSE**, using the boiling function.

³ Based on internal tests comparing the boiling of 2L of water with induction technology vs. gas and radiant technologies.

⁴ Compared to a standard Whirlpool hood.

⁵ Only with **6TH SENSE** Fresh Control and ActivO°. Based on internal tests carried out versus main competitors.

⁶ Based on internal test when pots and trays are loaded vertically in the back of the lower rack (status: October 2013).

⁷ Comparison between minimum and maximum consumption on the **6TH SENSE** programmes.

⁸ Tested by WFK - The German Testing Institute (WL 6173/12).

⁹ Comparison between maximum load and 1kg load on cotton 60°C + rapid function.

6th
sense®

Cooking

The smart 6TH SENSE technology intuitively anticipates and simplifies kitchen life, so you can enjoy food as never before.

INNOVATION

ABSOLUTE

The difference between performance & N° 1 Performance.

The first
induction
oven ever.

The induction system heats only the special tray and pot in the heart of your oven. Put your daily master chef recipe inside and enjoy the taste.

Perfectly
tender inside,
ideally crispy
outside.

6TH SENSE technology sets both power and grill function for every recipe in a very intuitive way. Results are always perfect with no efforts.

Up to 50%
less energy
and time.

Now you can save up to 50%¹ energy and time, compared to a regular oven, since the direct heating of the induction tray uses only the energy it needs, without waste.

¹ Using the induction function, compared to a Whirlpool oven without induction technology and with the pre-heat function.

Excellent cooking results while saving time and energy.

With a wide choice of designs, functions and easy to use displays, Whirlpool offers the ideal oven for every kitchen and every chef.

WITH COOK3, COOKING MULTIPLE DISHES IS AS EASY AS 1-2-3!

Cook3 offers further time and energy savings by allowing you to cook up to three separate dishes at the same time. The sophisticated convection system prevents their flavours and aromas from mixing, preserving the unique taste of each one. The combination of a powerful heating element and a unique airflow distribution system means you can do more great cooking in less time, consuming less energy!

READY TO COOK: NO MORE PRE-HEATING

The Ready to Cook function does away with pre-heating and is innovative and highly efficient air venting system which means an energy saving of up to 25%¹ compared to a traditional oven.

EASY CLEAN TREATMENT

The latest technology for the care of stainless steel has been applied so that grease, fingerprints and dust are easily removed. This special treatment preserves your appliances from the effects of ageing on stainless steel, so they always look perfect.

SELECT AND COOK

Thanks to **6TH SENSE** technology you can set your oven in 3 simple steps thanks to the intuitive programmer. You will enjoy the great taste of your masterpiece by simply selecting the cooking cycle. And the oven keeps in memory the last function used.

SOFT CLOSING DOORS

Selected Whirlpool ovens are now fitted with soft-closing hinges for a smooth "slow motion" action when closing the oven door: just one of the many small but significant details that make each appliance a real pleasure to use.

¹ Maximum saving obtained in tests with various combinations of dishes using "no-preheat" function compared to using "pre-heat" function.

FLEXIBLE, INNOVATIVE TECHNOLOGY FOR TOTAL COOKING FREEDOM

If you want to cook like a master chef, the unique **6TH SENSE** recipes option offers you an easy route to perfect cuisine. All you have to do is select one of the 30 pre-set recipes and the oven automatically sets the cooking function, temperature and cooking time, monitoring and controlling the cooking process to ensure outstanding results every time.

The **6TH SENSE** recipes menu covers 30 popular dishes:

- **Savoury dishes:** lasagne, fish cannelloni, crêpes au gratin, aubergine gratin, vegetarian pie, quiche lorraine, pizza;
- **Meat, fish and poultry:** pork chops, shank of pork, leg of lamb, kebabs, Mediterranean sea bream, salmon with herbs, fish baked in salt, roast chicken, chicken breasts;
- **Vegetables:** roast potatoes, vegetarian strudel, potato gratin, tomato gratin, vegetables gratin, stuffed pepper;
- **Desserts:** fruit tart, strudel, pear and chocolate cake, marble cake, cheese cake, yoghurt cake.

INDUCTION OVEN

Whirlpool presents its revolutionary new way of cooking, combining induction technology with traditional oven cooking to save you up to 50% energy and time¹ while delivering the best cooking results on the market². This is made possible by the revolutionary induction tray positioned inside the oven cavity, which holds a specially designed induction pan.

IXELIUM™

Exclusive nanotechnology treatment that protects iXelium™ hobs against yellowing and corrosion over time.

MULTI-FUNCTION COOKING

Whirlpool multi-function ovens offer the flexibility of a wide variety of cooking methods that can be used to cook different food types to perfection. The main cooking functions are detailed below and the symbols will help you make choices when you refer to the individual product pages.

FORCED-AIR

A fan behind the back wall of the oven forces air through heating elements into the oven from four directions. Food is cooked quickly and evenly in all parts of the oven (pre-heating is normally unnecessary). Different foods can be cooked simultaneously without mixing taste or smell.

CONVECTION COOKING

Fan assisted cooking with heat from top and bottom elements. Ideal for cooking biscuits and cakes.

TURBO GRILL

Grills faster and more evenly by boosting hot air around the grill zone. Ideal for grilling thicker pieces of meat. Gives cooking a 'spit-roast' effect; crisp on the outside and moist inside.

MAXI COOKING

Controls and balances the top and bottom heating elements to allow the oven to heat up more gradually and smoothly, giving you the greater control and delicacy needed for large cuts of meat.

GRILLS

Whirlpool ovens come with one of a number of different available grill models.

CONVENTIONAL COOKING

Combines top & bottom heating to provide a traditional cooking method with the oven hotter at the top. Ideal where a crisp finish is required or for slow-cooking casseroles.

TOP HEAT

Ideal for crisping at the end of a cooking cycle.

BOTTOM HEAT

Ideal for use at the end of a cooking cycle to brown the base of your food.

EXTRA BROWNING

Can be programmed to operate automatically at the end of a cooking programme to give the desired level of browning. Three settings are available.

FROZEN FOOD

A function for cooking pre-prepared and partially prepared frozen meals, with no need to pre-heat the oven or defrost the food first.

DEFROST

Fan only (without heat) at the back of the oven circulates air evenly around frozen food to minimise defrosting time.

KEEP WARM OPTION

Keep warm can be selected to activate automatically at the end of a cooking programme. Keeps food warm (but not dried out) for up to 4hrs.

LOW TEMPERATURE PROGRAMME

Incorporates two temperature options: a 35°C setting for defrosting and dough proving and a 60°C 'keep warm' setting.

FAST PRE - HEAT

Pre-heat function which rapidly heats up the oven to the optimal temperature, much faster than a non-boosted oven. A buzzer alerts you when it is time to put food in.

6TH SENSE STEAM FUNCTION

Steam-assisted cooking allows you to cook many kinds of dishes in an inspired new way, improving tenderness and guaranteeing juicy, tasty results every time. There are five different food categories to choose from: meat, fish, poultry, stuffed vegetables and baking.

GRILL & TURNSPIT

Ensures that large meat or poultry roasts are cooked right through. The turning action helps retain natural juices and flavour.

PIZZA/BREAD PROGRAMME

Developed with the help of top chefs, the Pizza/Bread programme gives you a choice of tailor-made cooking options.

XXL CAVITY

Whirlpool's largest ovens boast a spacious 73-litre cavity, offering a choice of 5 shelf positions and ensuring you have plenty of room to cook even the largest dishes.

¹ Using the induction function, compared to a Whirlpool oven without induction technology and with the pre-heat function.

² Based on internal tests comparing the Whirlpool Induction Oven with traditional electric ovens. Results were measured using the average score obtained across three categories: cooking results, time and energy saving.

INDUCTION OVEN

Always the best

cooking results in half the time.¹

AKZM 8910/IXL
60cm built-in oven

- 6TH SENSE
- 8 Multi-function cooking with electronic temperature control
- 73L Capacity
- 'A+' Energy efficiency
- 30 Assisted chef pre-programmed recipes
- Eco forced air
- LCD touch control
- Programmable digital timer
- Soft closing door
- Integrated handle
- High end triple-glazed door
- Inox
- Mirror finish
- Anti-fingerprint coating
- Electronic child lock
- Supplied with special induction tray & pan, & 2 wire racks

Perfectly browned outside, deliciously tender inside.

THE WHIRLPOOL 6TH SENSE INDUCTION OVEN

Induction technology, never before applied in an oven, gives you the opportunity of trying out a whole new way of cooking while guaranteeing all the benefits of a traditional oven. The induction tray warms the pot directly, ensuring fast and efficient cooking times: the food won't dry staying succulent and tender.

SUPERIOR RESULTS IN LESS TIME, CONSUMING LESS ENERGY

Only 6TH SENSE offers you the induction-grill combination which not only delivers better results than any other oven on the market whilst cutting power consumption by 50%¹, but it still offers 100% results with golden crusts and tender food. This is all thanks to the induction tray which can be positioned in the oven and used with the special induction pot.

Product Dimensions: HxWxD 595x595x538mm
Cut-out Dimensions: HxWxD 583+2x560x550mm
Twin partner: AMW 848/IXL, AMW 599/IXL, ACE 102/IXL, WD 142/IXL

COOKING LIKE AN EXPERT CHEF

When the induction tray is inserted in the oven, all you need to do is select the food category and weight; the oven detects its presence and begins the cooking procedure with no need to preheat. The 6TH SENSE technology automatically selects the optimal cooking parameters combining, if necessary, the grill. By simply removing the induction tray you can instantly revert to traditional cooking.

¹ Using the induction function, compared to a Whirlpool oven without induction technology and with the pre-heat function.

* The difference between performance & No 1 Performance (Refer to page 13).

The quick, convenient way to cook like a master chef.

AKZM 6560/IXL 60cm built-in oven

- 6TH SENSE
- 8 Multi-function cooking with temperature control
- 73L Capacity
- 'A+' Energy efficiency
- 30 Assisted chef pre-programmed recipes
- Eco forced air
- LCD touch control
- Programmable digital timer
- Soft closing door
- Integrated handle
- High end triple-glazed door
- Inox
- Mirror finish
- Anti-fingerprint coating
- Electronic child lock
- Supplied with 1 wire rack, 2 baking trays, & 1 fat pan

Whirlpool 6TH SENSE ovens save you time, effort and energy while feeding your passion for cooking.

YOU CREATE, IT COOKS

No other competitor's oven is equipped with the exclusive 6TH SENSE technology. Select the food type, press OK and the oven will automatically suggest the ideal cooking programme, temperature and time for maximum results and minimum power consumption. To make things even easier you have 30 pre-set recipes at your disposal.

READY TO COOK

The Ready to Cook option conveniently eliminates the need to pre-heat the oven, no matter what you're cooking and it does so without any compromise on cooking performance. A unique patented algorithm controls the powerful heating element, so your oven is ready to go whenever you are. Not only does that save you up to 25% of your valuable time, it also uses up to 20% less energy¹. What's more, the controlled heating process also eliminates the risk of excessive browning - perfect for dishes that need gradual cooking for best results.

FUSION LINE

Ovens belonging to the Fusion line offer state-of-the-art technology and design in terms of performance and technical advancements. Selected models come with 6TH SENSE technology to meet your every requirement and perfect results every time. The contemporary essential design and the totally integrated handles are meant to enhance the flush aesthetic of the Fusion line. Moreover, your kitchen will experience a long lasting brilliance thanks to the iXeliumTM treatment: a revolutionary protection applied exclusively by Whirlpool to reduce scratches and to ensure an extra shine to the steel surfaces.

- Electronic child lock
- Supplied with 1 wire shelf, 2 baking trays, steam jug, and sponge

Whirlpool's combi steamer, using its unique Steam Generator, is the ideal way to cook a range of dishes to perfection, preserving their full nutritional value.

A WORLD OF TASTY, NUTRITIOUS FOOD

Whirlpool Steamers will breathe new life into your cooking, ensuring delicious results with the best possible retention of nutritional value. The steam function injects steam directly into the oven cavity, making for an extremely even and delicate cooking process. Your food emerges with an irresistible appearance, an unbeatable taste and best of all, it doesn't lose important vitamins and minerals while cooking. The Combi Steamer combines the power of steam with the intelligence of Whirlpool's unique **6TH SENSE** technology to give your favourite dishes a deliciously fresh quality. You can use it either as a steamer or as a conventional oven, or combine both modes to open up a world of sophisticated new recipes.

FAST, EFFICIENT COOKING

Cooking with steam is not only healthy, it's also more efficient than conventional cooking. Whirlpool Steamers cook faster than traditional ovens, freeing up more of your valuable time for other things.

The **6TH SENSE** technology in the Combi Steamer injects just the right amount of steam into the cooking process at the right temperature and at the right time,

while special sensors constantly monitor the quantity and temperature of steam in the cavity to ensure your food is cooked to perfection. With the heating element placed at the back, food is also crunchy on the outside.

PERFECT FOR REHEATING

Whirlpool Steamers are ideal for reheating. The Finishing function warms pre-cooked food very gently with no risk of drying out, so it tastes as fresh as the moment it was first prepared.

SPACE FOR YOUR CREATIVITY

The generous 32L cavity of the Whirlpool Steamer gives you the space to prepare dishes of all different sizes and shapes. You can choose from a range of different shelf positions to use the space in the best way for whatever combination of dishes you want to cook.

AN APPETITE FOR DESIGN

Designed for ergonomic efficiency and perfect aesthetic harmony with Whirlpool ovens and microwaves in the Fusion range, the Whirlpool Steamer represents an attractive enhancement to any kitchen.

Real Italian espresso at home.

Easy to use and easy to clean, Whirlpool's coffee machine offers the pleasure of real espresso coffee at the touch of a button.

FULLY AUTOMATIC COFFEE MACHINE

With Whirlpool's double thermoblock system and optimal water pressure, this fully automatic coffee machine makes perfect tasting, intensely flavoured, real Italian espresso and creamy cappuccino. Its compact dimensions (46cm in height) make it ideal to combine with a warming drawer, thus fitting a traditional oven space in your kitchen. The brewing unit is removable, allowing easy and perfect cleaning. The water tank and drip tray are accessible from the front and there are separate containers for coffee beans and pre-ground coffee. The machine allows you to set the display to your own language and personalise your settings: strength of coffee, temperature and other options. The aesthetics match that of the Fusion Line products. A great looking appliance, in tune with the latest kitchen trends.

COFFEE MACHINE

ACE 102/IXL
integrated coffee machine

- Fully automatic
- 5 coffee sizes, i.e: espresso, mug, etc.
- 5 different coffee strengths (extra-mild to extra-strong)
- Takes coffee beans and ground coffee
- 3 Temperature settings
- Espresso boiler
- Cappuccino milk steamer
- Hot water for tea
- Water tank capacity: 1.8L
- Frothed milk spout
- Full touch control
- Auto-start/switch off function
- Clock
- Light
- Anti-fingerprint stainless steel
- Dishwasher-safe drip tray
- Pump pressure: 15 bar
- Total power: 1350W

Microwave Ovens

Smart 6TH SENSE technology intuitively anticipates and simplifies kitchen life, so you can enjoy cooking and perfectly prepared food as never before.

INNOVATION

ABSOLUTE

Discover the N°1 in microwave cooking.¹

Perfect results, intuitively.

All you need to do is put your food into the microwave oven and the **6TH SENSE** technology will automatically regulate power and time to give you the best results according to the special food class.

Matching design.

Sleek and modern design that perfectly matches with the oven for a seamless elegant look.

Unbeatable crispness.

Thanks to the exclusive Crisp function, you will have irresistible crispness for all of your recipes, in very few minutes.

¹ Using the induction function, compared to a Whirlpool oven without induction technology and with the pre-heat function.

An accessory for everything.

With a wide range of models to choose from, there is a Whirlpool microwave oven to enhance every cooking style and suit every kitchen, especially as it is designed to match Whirlpool's traditional oven designs.

CRISP PLATES

Whirlpool crisp plates facilitate fast and easy preparation of most common dishes. The crisp plates can only be used with microwaves that have the Crisp function. All crisp plates are anti-stick and dishwasher safe. You can choose among different sizes according to your microwave capacity.

STEAMERS

Steamers are ideal for steaming vegetables, fish, pasta and for fat-free cooking. They are also ideal for defrosting, heating or storing food in the fridge or freezer. Suitable for steam cooking in all microwaves, including those without a dedicated function.

CRISP PLATE HANDLE

Recommended to safely remove the hot crisp plate from the microwave.

GRILLING GRIDS.

Stainless steel grids are ideal to raise the level where food is cooked to ensure a perfectly grilled finish.

GLASS TURNTABLES

Glass turntable to be fixed inside the microwave. This will support both crisp plates and all the dishes you use to cook or reheat your recipes.

PLASTIC COVERS

To prevent spillages of food in your oven.

Intelligent microwave design for total cooking versatility.

With a wide range of models to choose from, there is a Whirlpool microwave oven to enhance every cooking style and suit every kitchen, especially as it is designed to match Whirlpool's traditional oven designs.

6TH SENSE TECHNOLOGY FOR SIMPLE PERFECTION

Thanks to Whirlpool's intelligent **6TH SENSE** functionality, you can cook a wide variety of dishes to perfection with no need to programme the microwave oven. The oven automatically selects and constantly adapts the energy level for consistent performance and perfect results every time, whatever the original temperature of your food (raw, frozen or fresh) and whatever combination of food types you are cooking.

ASSISTED CHEF EVOLUTION. UP TO 71 PRE-SET RECIPES

No matter what you want to cook, Assisted Chef evolution knows just how to do it. The innovative text assisted display perfectly matches Whirlpool's built in ovens and has a selection of 11 food types and, depending on the model, 58 or 71 pre-set recipes. Just make your selection and the oven sets the ideal programme and time for a perfect result, every time. The text assisted LCD display uses easy-to-read symbols and text to give you clear indications throughout the cooking process.

ROTATE AND CONFIRM

The new **6TH SENSE** microwave oven in the Absolute range always provides outstanding results thanks to the "rotate and confirm" approach. The central **6TH SENSE** programmer is the unique element of interaction to set the cooking cycle for the best cooking results through intuitive simplicity.

3D SYSTEM. CUSTOMISED WAVE DISTRIBUTION

A Whirlpool exclusive patent, the 3D system, controls the distribution of the waves in the oven. Food is reached in a balanced manner by waves that move in a three-dimensional pattern ensuring uniform defrosting, warming and cooking. Cooking times are also faster.

DELICIOUSLY CRISP DEFROSTED BREAD

Thanks to the brand new Bread Defrost function, you can enjoy rapidly defrosted bread that is as crunchy and delicious as if it had just been freshly made. Combining the speed of the Jet Defrost function with Whirlpool's exclusive Crisp technology, Bread Defrost lets you savour the sensation of tasty warm bread whenever you want it.

6TH SENSE TECHNOLOGY FOR SIMPLE PERFECTION

Thanks to Whirlpool's intelligent **6TH SENSE** functionality, you can cook a wide variety of dishes to perfection with no need to programme the microwave oven. The oven automatically selects and constantly adapts the energy level for consistent performance and perfect results every time, whatever the original temperature of your food (raw, frozen or fresh) and whatever combination of food types you are cooking.

6TH SENSE CRISP

This sophisticated function takes full advantage of Whirlpool's 3D Crisp technology to cook perfect pies, quiches and pizzas, evenly browned on top and underneath. For results as good as a traditional oven but in a fraction of the time. Available on Perfect Chef models.

6TH SENSE REHEAT

One-touch functionality for perfect results on chilled or frozen food.

6TH SENSE STEAM

Advanced steam cooking function with sensor technology to ensure your food tastes great and preserves its texture and nutritional value. The transparent, heat-resistant, dishwasher-safe steamer takes big loads and lets you monitor progress. Available on Perfect Chef models.

6TH SENSE DEFROST

This function allows you to quickly defrost food automatically. Use this function to defrost Meat, Poultry, Fish, Vegetables or Bread.

JET START

By pressing the Jet Start Button the Microwave function will start at maximum power for 30 seconds. This function is useful for quick reheating of food with a high water content such as clear soups, coffee or tea.

JET DEFROST

The unique uniform energy distribution of the the 3D system provides exceptionally fast and even defrosting. Simply select the food type, set the weight and press start.

CRISP FUNCTION

Ferrite Crisp plate, grill and 3D microwave system for fast, even cooking, browning and crisping of pies, quiches and pizzas. Food cooks as fast inside as out and so is never undercooked or overgrilled. Available on Perfect Chef, Space Chef, Mini Built-in and Microwave Hood combination models.

FORCED-AIR

A process ensuring perfectly even cooking results. Four large perforated air inlet areas at the corners of the back wall evenly distribute powerful air streams throughout the cavity, avoiding overcooking or uneven browning.

TRADITIONAL GRILL

This fast, powerful grill ensures grilling and browning results as good as those from a traditional oven. The large element can be tilted for easy cleaning.

STEAM

Quick, healthy steam cooking with a specially designed steamer vessel and pre-programmed settings for potatoes/root vegetables, ordinary vegetables, frozen vegetables and fish, ensuring perfect results. Just add water to the steamer then select the food class and weight.

DEFROST

Special function for defrosting Meat, Poultry, Fish, Vegetables Bread and fruit using the gentle touch of steam.

KEEP WARM

Keeps food warm (but not dried out) for up to 4hrs.

FAST PRE-HEAT

Pre-heat function which rapidly heats up the oven to the optimal temperature, much faster than a non-boostered oven. A buzzer alerts you when it is time to put food in.

ASSISTED CHEF EVOLUTION

No matter what you want to cook, the Assisted Chef Evolution knows just how to do it. The innovative text-assisted display perfectly matches Whirlpool's built-in ovens and has 11 food types. Just select what you want to prepare and the microwave oven chooses the ideal programme and time for a perfect result every time. The text-assisted LCD display uses easy-to-read symbols and text to give you clear indications throughout the cooking process.

I-COOK EVOLUTION

The next generation of the I-Cook user interface with enhanced features is available on the microwave ovens. It comes with printed panel graphics and a simply worded text-assisted display. This acts as a guide during set-up and operation. The I-Cook User Interface offers flexibility of use, including various special functions such as feedback on what the microwave oven is doing.

FAVOURITES

Personalise your microwave by memorizing up to 10 of your most favourite microwave creations guaranteeing you perfect results every time. Just press the "favourite" button and the microwave will do the rest for you.

ELECTRIC MICROWAVE

AMW 848/IXL
built-in microwave oven

- **6TH SENSE**

- Child lock
- Supplied with 1 Crisp™ plate, 1 Crisp™ handle, 1 steamer & 1 low wire rack

6TH SENSE TECHNOLOGY FOR SIMPLE PERFECTION

Thanks to Whirlpool's intelligent **6TH SENSE** functionality, you can cook a wide variety of dishes to perfection with no need to programme the microwave oven. The oven itself selects and constantly adapts the energy level for consistent performance and perfect results every time, whatever the original temperature of your food (raw, frozen or fresh) and whatever combination of food types you are cooking.

Equipped with advanced **6TH SENSE** and Crisp™ technologies, Whirlpool microwaves combine 3 different cooking methods: convection, steam and microwave. This unique combination lets you create superb meals in a fraction of the usual time. Offering generous interiors for big dishes, these ovens come in a variety of styles with a wide range of functions, so you're sure to find one to suit your kitchen and your lifestyle.

Finished in stainless steel and glass, their simple lines fit seamlessly into any kitchen. Their sophisticated functionality allows you to cook a surprising variety of dishes, all with the results you would expect from a regular oven, at microwave speed.

Each microwave oven is designed to be a perfect match for Whirlpool conventional ovens. To ensure they stay beautiful, they can feature the easy clean treatment for rapid removal of grease, fingerprints and dust.

Every detail, from the position of the controls to the way the door opens, is carefully refined to make your cooking experience simpler and more enjoyable.

PERFECT CHEF

The Perfect Chef microwave ovens match the design of the Fusion and Ambient lines. They can be installed both in a tall unit or below the work top. These ovens come equipped with exclusive Whirlpool technology like **6TH SENSE** Steam, Crisp and Jet Defrost as well as a 40L capacity and iXelium™ finish, a special treatment based on nano-technology that protects the oven surface from scratches and eases the removal of fingerprints, grease and dirt.

Hobs

Smart 6TH SENSE technology intuitively anticipates and simplifies kitchen life, so you can enjoy cooking and perfectly prepared food as never before.

Cooking becomes creativity, in just one **touch**.

A function for each need.

With the new line of induction hobs every cooking area is specifically designed so that the **6TH SENSE** technology can ignite the right function such as melting, simmering, warming up, for your special ingredients with extreme care.

Flexibility serves performance.

With FlexiCook you can join two cooking zones and intuitively create the ideal surface to prepare even the biggest dishes. Each cooking area can also be independently controlled, heating all the pots evenly to let you always have the best results.

Boiling in no time.

Water reaches boiling fast, thanks to the **6TH SENSE** technology that directly heats the hob. The signal lets you know when the water is boiling.

The intelligence to make cooking simpler.

The new induction hobs offer you clever, flexible, precise and simple to use design and a speed you'll fall in love with.

INDUCTION TECHNOLOGY

Induction heats the pan, not the hob. When a ferrous metallic pan is placed on the hob, an electromagnetic field passes through the ceramic glass top, heating the pan instantly and uniformly. As well as saving time and energy, induction hobs are extremely safe and easy to clean thanks to their sheer, flat surface. Precise induction technology guarantees perfect control for everything from melting chocolate to sautéing.

LESS ENERGY, YET FASTER

Induction hobs are the best alternative to traditional gas or vitroceramic hobs in terms of energy efficiency and cooking time. Induction technology generates heat directly to the pan, in this way less than 10% of the energy used is lost to the surrounding atmosphere and 90% of the energy is used for cooking.

COOKING FUNCTIONS FOR ALL YOUR NEEDS

Thanks to **6TH SENSE** technology, you always get master chef results in the most intuitive way. With just one touch, you can easily select the perfect cooking functions and the hob will automatically adjust to the right power level allowing you to create your best recipes. Innovative design, great to cook with, great to look at.

DOMINO LINE

Whether you have limited space or want to tailor a hob to suit your particular cooking needs, Domino hobs offer the perfect flexible solution, with a variety of different power types to choose from. You can opt for a metal or glass surface, and you can combine different hob types such as gas, vitroceramic and induction with different functions and energy levels, featuring the ideal solution for every type of cooking, from fast frying to barbecuing, gentle simmering and sautéing. Experience the beauty of glass modules and combine them to create your ideal space. Perfect cooking results, from gas (1 or 2 burners), ceramic and ultra-efficient induction plates (1 or 2 zones).

EASY USER INTERFACE

An innovative user interface makes these hobs incredibly easy to use. You adjust the power via a touch-sensitive slider, giving you total control over the induction process, while a simple lighting display shows you at a glance which cooking zones are in operation. A timer system even lets you set the cooking time separately for each cooking zone.

COOKING • HOBS • GLOSSARY

6TH SENSE

6TH SENSE controls the cooking process, so you don't have to watch your hob when boiling water. **6TH SENSE** automatically controls the temperature and provides acoustic feedback when water reaches boiling point. If the temperature gets too high, **6TH SENSE** automatically turns off the plate, preventing overflowing.

IXELIUM™

Exclusive nanotechnology treatment that protects iXelium™ hobs against scratches and yellowing over time.

4 CROWN BURNER

Extremely powerful burner (3.7kW, diameter 13.5cm) that ensures even distribution, ideal for frying with a wok.

ULTRA RAPID BURNER

Innovative burner (3.5kW, diameter 11 cm) with excellent characteristics for time saving and perfect cooking.

VERTICAL BURNERS

Vertical burners provide direct heating to the pot, heating the pot faster.

INTEGRATED IGNITION

An integrated sparking unit allowing you to light any burner immediately.

FLAME FAILURE SAFETY SYSTEM

The safety system immediately interrupts the gas supply in the event of the flame going out.

SEPARATE TIMER FOR ALL ZONES

New timers for each zone help make cooking easier, allowing you to set a separate cooking time for each plate.

SINGLE PAN SUPPORTS IN CAST IRON

Pan supports in cast iron, known for their excellent capacity for heat transmission and resistance to high temperatures. Their clean, square design guarantees maximum stability for your pots.

TWIN GRID IN CAST IRON

The twin grid offers you extended flexibility for cooking with large pots and pans of every shape.

FLEXICOOK

Gives you the flexibility to connect two zones and create a larger cooking area with an even temperature in order to accommodate bigger or more pans together.

SUPER BOOST 5000W

POWER BOOSTER

An extremely powerful 5kW booster reaches maximum power about 30% more quickly than an equivalent cooking area with standard booster (3.7kW).

SLIDER CONTROL

Power is easy to adjust using a slider, the light around buttons immediately showing which zones are switched on, offering clear feedback on the cooking process.

PAUSE FUNCTION

If you have to leave the kitchen momentarily, you can put your hob on hold, maintaining all your cooking settings while the hob is off. Cooking is easily resumed by simply pressing the button again.

BIG 30CM ZONE/BURNER

Big dual zone with a 30cm diameter gives you the flexibility to use large pots and pans.

ENDURING SHINE

Steel that keeps its shine over time.

EASY CLEAN

Easily cleanable using water.

HIGHER RESISTANCE

Higher resistance to scratches.

20% SAVING

Saves up to 20% on cooking time.

INDUCTION

ACM 849/BA
77cm glass hob

- **6TH SENSE**
- 4 Induction cooking zones
- 1-9 Heat setting
- Total power: 8000W
- Pause function
- Power on indicator
- Residual heat indicator
- Melt, simmer, & boil options
- Touch control
- Child lock
- Bevelled frame
- Black
- Induction pots & pans compulsory
- Whirlpool WPRO pot converter accessories available

AS SPECIAL AS EACH
OF YOUR RECIPES

The secret for perfect cooking is having the right tools. With the **6TH SENSE** induction hob you have a specific hob for warming, boiling, melting and simmering. With just one touch, **6TH SENSE** automatically sets the power according to the selected function: forget any mistakes. Furthermore, a new coloured light in the serigraphy will easily guide you during every moment.

MAXIMISE YOUR FLEXIBILITY

Thanks to the Connexion Zone, you can combine cooking zones together and set the same temperature for larger pans and pots in a very intuitive way. The Dual Zone is even more versatile as it can be used for both big and small pots, from 12cm up to 28cm in diameter, and is equipped with a very powerful booster of 3 kW.

FLEXICOOK

With Flexicook you can create the ideal cooking space to cook with pans of any size. You can use pots from 12cm in diameter to 40x24cm, from just one pot all the way to 10 little ones. Furthermore, the consistent temperature in all zones lets you cook food evenly and quickly thanks to the 4 kW booster. Flexicook gives you a direct feedback in every moment of the preparation. Every time you

move the pot from one zone to another, the hob immediately applies the right cooking power and the light display confirms which zone is working.

THE ESSENCE OF POWER

Thanks to the power management function, it is possible to set a maximum total power absorption level for the hob, choosing between 4 different power ranges. This way you can avoid the risk of overloading your home power supply.

EASY INSTALLATION

Installation has never been so easy thanks to the clip-in brackets that require no tools or screws.

INNOVATION

Designed

for best cooking
and best looking.

Ultimate long lasting brilliance.

Thanks to our revolutionary iXelium™ treatment highly resistant to scratches and yellowing, both grids and burners stay shiny for longer and are super easy to clean simply with water.

Unique flame power.

The new vertical distribution of the flames ensures excellent energy efficiency with savings up to 20% both on boiling time¹ and energy².

Design, to the last detail.

The minimal style and the hob design perfectly integrate with the other elements of the Fusion, Ambient and Absolute lines, for a perfect total look.

¹ Compared to a traditional Whirlpool gas hob while boiling 2 litres of water.

² Compared to a traditional Whirlpool gas hob. Efficiency represents the percentage of heating transmission of the flames to the pot.

Ultimate technology and design in brilliant harmony.

Flowing form and minimalist lines give the iXelium™ hob in Supreme Design its unique and prestigious elegance. The burners, perfectly set in the steel surface, and the iXelium™ grids seamlessly combine technology and superlative design for an extraordinary aesthetic look.

AWARD-WINNING DESIGN

The Whirlpool iXelium™ cooktop in Supreme Design won the prestigious iF Gold Design Award in 2012 for its perfect pairing of technology and sophisticated design. The essential curves of its five burners are fully integrated into the flowing surface of the top, while the impeccable details of the grid design add elegance to its refined appearance. If you're looking for a cooktop that's in perfect harmony with modern kitchen design, look no further.

THE COOKTOP THAT NEVER LOSES ITS SHINE

Thanks to its exclusive nano-technology, the Whirlpool iXelium™ cooktop in Supreme Design does not turn yellow or corrode and offers strong resistance to scratching¹. And with no need for aggressive chemical detergents, it is green and easy to clean. The result is what everyone desires: a cooktop that never loses its shine.

SUPER-EFFICIENT BURNERS

The patented technology of the five burners offers maximum flexibility of use and delivers up to 20% greater efficiency². Thanks to their innovative design and vertical flames, the burners are closer to pots and pans, for even more direct heating. This reduces water boiling time by 20%³, ensuring superlative performance and exceptional energy savings. What is more, each burner lights up the moment you press and turn the knob and is immediately ready for use: no waiting, just instant satisfaction.

TWO DIFFERENT VERSIONS TO CHOOSE FROM.

To cater for different preferences, the Whirlpool iXelium™ cooktop in Supreme Design is available in two different versions. In the first, only the cooktop surface is coated with iXelium™ technology, while the second extends the advantages of the iXelium™ coating to all steel parts including the grids and burners. iXelium™ work tops are the only ones on the market to be equipped with grids and spreaders entirely in iXelium™, remaining brilliant in time without yellowing or losing their shine.

¹ As demonstrated in tests carried out at the laboratories of TÜV Rheinland Italia. TÜV Rheinland Italia, a member of the TÜV Rheinland Group has been a global leader in independent safety and quality certification for products, services and corporate systems for over 130 years, with over 300 offices in 60 countries.

² Compared to a traditional Whirlpool gas hob. Efficiency represents the percentage of heating transmission of the flames to the pot.

³ Compared to a traditional Whirlpool gas hob while boiling 2 litres of water.

sense®

Hoods

The unique 6TH SENSE technology is designed to sense the air and set the right power, automatically in just one touch. And there's always a perfect atmosphere in your kitchen.

The beauty of a perfect atmosphere.

No odours,
less noise.

Thanks to the innovative **6TH SENSE** technology, the aspiration power is automatically adjusted: noise and cooking odours will be nothing but a distant memory.

Absolute
design.

There's always a perfect total look in your kitchen. The black glass surface perfectly matches with all other appliances and the **6TH SENSE** touch user interface even more emphasizes the hood's supreme design.

Up to
50% energy
saving.¹

Thanks to the **6TH SENSE** innovative self-adjusting aspiration system, you can save up to 50%¹ energy because the power of aspiration increases only when it's necessary.

¹ Compared to standard Whirlpool hood.

A breath of fresh air in your kitchen.

Whirlpool hoods improve the atmosphere in your kitchen with high performance, low noise and striking design.

HOODS THAT ADAPT TO THE MENU

Whirlpool's exclusive **6TH SENSE** technology offers outstanding performance combined with exceptional energy savings. Using built in sensors to monitor the air above your cooktop, whatever you are cooking, **6TH SENSE** hoods adjust the power to the ideal level without you even having to think about it.

OPTIMISED FOR ALL CIRCUMSTANCES

The food cluster based menu automatically sets the right extraction power according to the kind of cooking method (re-heating, boiling, frying, intensive speed mode). The central capacitive touch **6TH SENSE** programmer, back-lighted and serigraphed, is the only element of interaction to set the hood modes.

NEXT GENERATION ASPIRATION POWER

The Whirlpool T-shaped hoods represent the new generation for this product category, offering an extraordinary aspiration performance. Thanks to the new Whirlpool extraction technology, your hood will ensure an extraction power of up to 800m³/h.

FILTERS TYPES AND PERFORMANCES

Aluminium grease filters capture the grease particles produced while cooking, retaining all unpleasant smells. With stainless-steel grease filters, the grease-laden air is forced to move through a twisting series of channels, this way it comes into contact with a large surface area where the grease particles are retained. Both aluminium and stainless steel grease filters are dishwasher safe. With perimetral extraction, the rectifying panel breaks the flow of the fumes, directing them towards the outer edges of the hood where more grease can be collected.

COOKING • HOODS • GLOSSARY

6TH SENSE

In "automatic" mode, the hood self-sets according to the sensor readings, while 'manual' mode lets you set the hood to the speed you prefer.

ELECTRONIC SLIDER

This convenient feature makes it easy to set the ideal power level in a smooth way.

TOUCH CONTROL USER INTERFACE

Stylish, high-tech and extremely easy to operate. Various types of touch control user interfaces with delay timer and intensive function are available.

HALOGEN LIGHTING SYSTEM

The innovative lighting feature on the **6TH SENSE** Adaptive Hood uses halogen lighting.

CONSTANTLY IMPROVING AIR QUALITY

The Air Quality Function allows for a continuous and silent replacement of air in your kitchen, by operating at minimum power for 5 minutes every half an hour. When you need to remove intensive fumes or vapour quickly the Boost Function does the job, running on full power for 5 minutes.

6th
sense

Cooling

The innovative 6TH SENSE technology is designed to automatically adapt the temperature and humidity levels to each of your favourite foods, so that you can enjoy their freshness for up to 4 times longer.¹

¹ Compared with Whirlpool total NoFrost refrigerator. Freshness has been calculated as an average taking into account variation of food colour, pH and weight loss measured over a period of time. Time guidelines may vary depending on original food quality.

INNOVATION

The N°1 in fresh and frozen food preservation.¹

Long life to your food.

Ideal for fresh and frozen food.

Two total NoFrost systems, one for the fridge, one for the freezer, to create the ideal frost free climate with no odour mixing for better tasting food.

Frozen food tastes fresh even after defrosting.

FreezeControl reduces temperature fluctuations in the freezer to the minimum thanks to an innovative air system. Freezer burns are reduced up to 50%² and food preserves more of its original quality and colour.

Fresher for Longer.

6TH SENSE FreshControl guarantees advanced humidity regulation in the whole cavity thanks to its innovative sensors. Freshness lasts longer and food preserves best taste and colour.³

¹ Based on internal food tests conducted by Whirlpool, measuring reduction of food weight loss and decolouration driven by Fresh Control and Freeze Control technologies (November 2014).

² Based on results of SLG Prüf-und Zertifizierungs GmbH, an independent institute, comparing a Whirlpool fridge-freezer with Freeze Control technology to a Whirlpool fridge-freezer without Freeze Control technology.

³ Based on internal food tests conducted by Whirlpool.

The N^o1 in fresh and frozen food preservation.¹

Whirlpool understands your needs and knows that you take care of all the things you love everyday, in a unique and special way. That is why our Supreme NoFrost refrigerators are equipped with two active total NoFrost systems, one for the fridge and one for the freezer, so as to create the ideal frost free climate for preserving your food.

SUPREME NOFROST

Supreme NoFrost has two separate Total NoFrost systems: one for the fridge and one for the freezer. This makes the two compartments totally independent, ensuring excellent preservation: optimum humidity, no odour mixing and no frost in the freezer or in the fridge, guaranteeing the best frost free climate to store fresh and frozen food.

THE ACTIVO° COMPARTMENT

This technology maintains an ideal environment for storing meat and fish. The temperature in the Activo° compartment is approximately 0°C, meaning that food stays fresh longer and conserves its appearance, texture and nutritional properties. The system can be switched off and the compartment used for normal storage.

6TH SENSE TECHNOLOGY

The innovative **6TH SENSE** technology keeps the temperature and humidity level inside the entire compartment constant through time so that when you close the fridge door the right temperature is re-established quickly with minimum energy consumption. You do not waste energy anymore and your food is preserved at its best.

ENERGY SAVING

With the new Supreme NoFrost refrigerator, you will get the best energy efficiency in its class. The advanced electronic interface combined with a variable speed efficient compressor, reduces energy consumption. You can save from 48% on energy consumption with an A+++ model, up to 53% with an A+++ -10%.²

RENEWED ABSOLUTE DESIGN

Attention to detail has always been a Whirlpool priority. ABSOLUTE Design is emphasised even more thanks to the modern flush Supreme NoFrost model. The premium version offers a flat door with a flush handle and an intuitive user interface built into the floating handle. For longer lasting beauty, the black glass, the stainless steel and the new inox-optic door finishes ensure an improved fingerprint-resistant and non-scratch surface. You can also discover the other models of the Supreme NoFrost range, always with a premium look but with different handle designs to satisfy every need.

Introducing
Supreme
NoFrost

The new era of food preservation begins here

WHIRLPOOL SUPREME TOTAL NOFROST

- 2 NoFrost systems
- Humid air preserves food
- No mixed odours

TRADITIONAL TOTAL NOFROST

- NoFrost systems
- Dry air damages food
- Mixed odours

¹ Based on internal food tests conducted by Whirlpool, measuring reduction of food weight loss and decolouration driven by Fresh Control and Freeze Control technologies (November 2014).

² With reference to the average energy consumption of a Whirlpool equivalent appliance in A+ class (based on EEL).

COOLING • GLOSSARY

6TH SENSE FRESH CONTROL

Whirlpool's unique **6TH SENSE** Fresh Control technology controls temperature and humidity to maintain the best conditions for long-lasting food freshness, up to 4 times longer¹.

ACTIVO° SYSTEM

Activ0° is an isolated system kept at a constant temperature of 0°C, the ideal level to keep fish and meat fresh. The combination of **6TH SENSE** Fresh Control technology with the Activ0° system throughout the fridge provides "best in class" food preservation for all types of food.

NOFROST TECHNOLOGY

NoFrost technology prevents the formation of ice in the freezer.

STOPFROST

The StopFrost device collects frost and defrosting takes just 1 minute by cleaning the device under the tap. Freeing your freezer from frost has never been so easy.

BLACKOUT ALERT

Automatically checks the temperature when the electricity supply is restored after a power cut. A LED blinks when the temperature has risen above -8° in the freezer.

VACATION MODE

A simple function that allows the fridge to be switched off while the freezer stays on, saving energy while you are away without the inconvenience of emptying and switching off the appliance completely.

ANTIBACTERIAL SYSTEM

An air filtration system developed in conjunction with Microban®, the market leader in antibacterial solutions, to reduce unpleasant odours and proliferation of bacteria in the fridge. The filter is easily replaceable every 6 months.

100% CFC & HFC FREE

In accordance with the company's policy of environmental friendliness, all Whirlpool cooling appliances are completely CFC-free and HFC-free.

TEMPERATURE DISPLAY

Digital displays show the set temperatures in the fridge and freezer compartments.

CHILD LOCK

This locks the functions, preventing the danger of children altering functions or functions being altered during cleaning.

LED ILLUMINATION

The new LED illumination system spreads the light evenly inside the cavity. Thanks to the beauty of their light, it is simple to find what you are looking for. LED illumination is twice as bright and consumes 10 times less energy².

BOTTLE BALCONY

Up to 2L capacity storage for bottles in an extra-large, rounded, transparent door shelf, which is easily adjustable and removable.

BOTTLE RACK

Metal-finished rack for storage of wine bottles, can be inserted in place of an ordinary flat glass shelf.

CONTROLLED TEMPERATURE COMPARTMENT

A special compartment with a temperature approximately 3-5°C lower than in other parts of the refrigerator, considerably prolonging the storage of fresh food (fish and meat) without loss of freshness or nutritional properties and without the need to freeze.

DAIRY COMPARTMENT

A special isolated compartment for storing products like butter, preserving them better and preventing odours from mixing.

CRISPER DRAWER AND SHELF RETENTION

Drawers and shelves are fixed to the interior with 'safety stop' functionality, so they won't fall out when opened completely.

TEMPERED GLASS SHELVES

Extra strong glass shelves, easily removed for cleaning and quickly adjusted to different heights.

SPILL-GUARD

Attractive, transparent plastic edges on shelves provide a handy 'spill-guard' function, preventing spillage in the fridge spreading beyond the shelf.

DEEP BALCONIES

Extra-deep (160mm) balconies with no compromise on the size of the crisper. Ideal for bottles and fruit juices, they have a useful divider to keep smaller items in place.

REVERSIBLE DOORS

Whirlpool refrigerators give you the option to change the direction in which the doors open.

ALL THE CAPACITY YOU NEED

Whirlpool's combi fridge-freezers come in a range of different shapes and sizes, from standard 60cm appliances to extra-wide 80cm models with a capacity of 560L. That's more space than the biggest freezer on the market.

¹ Compared to Whirlpool Supreme NoFrost refrigerator. Freshness has been calculated as an average taking into account variation of food colour, pH and weight loss measured over a period of time. Time guidelines may vary depending on original food quality. Always respect expiry dates where stated.

² Compared to a normal bulb.

Dishwashing

The intelligent 6TH SENSE technology is programmed to give you the clean and shine you demand without prewash or effort, leaving you the time to enjoy what you love.

Discover the N°1 in cleaning and drying in just one hour.¹

Ultimate spotless drying.

Take your glasses straight from the dishwasher and onto the table, without the need to towel dry, as they are spotlessly shiny thanks to PowerDry™ technology.

Even plastic items.

Outstanding drying results even on plastic items, so you can put them straight back into the cupboard.

No prewash.

The intelligent **6TH SENSE** sensor detects the level of soil and regulates the water pressure of 28 powerful jets of PowerClean™ technology accordingly.

¹ Using the 1 hour wash & dry program.
Based on internal test result (Status date August 2013).
The PowerClean function cannot be used with 1 hour wash & dry program.

The innovation that revolutionises dishwashing.

Minimalist outside while fully equipped inside. Modern flush aesthetic with a new user interface for seamless interaction and improved usability. Designed to save space, not performance.

NEW INTERIOR DESIGN. IMPROVED QUALITY

Premium new design, harmonised rack colours and new shiny stainless steel handle for improved ergonomics. Improved quality and stability when loading and unloading thanks to a new rack system with more stable partitions.

FITS ALL YOUR DISHES

Admire the flexibility and loading capacity found in Whirlpool's dishwashers. Up to 13 place settings with a 3rd rack in the top to fit all of your cutlery and cooking implements.

ULTIMATE CLEANING WHILE SAVING WATER, ENERGY AND TIME

6TH SENSE technology offers you the most efficient optimisation of resources on the market. A sensor constantly checks the water to determine if wash cycle variations are required, and you can get up to a 50%¹ saving on energy, water and time.

ENERGY EFFICIENT POWER

Whirlpool's PowerDry™ technology guarantees the quickest and most efficient drying cycle while offering the most energy efficient standard on the market, A+++ . The outstanding washing and drying results together with the reduced energy consumption make PowerDry™ dishwashers unique and unequalled in performance.

¹ Comparison between minimum and maximum consumption on 6TH SENSE programmes.

CLEANING • DISHWASHING • GLOSSARY

6TH SENSE

With full drying effect, for all kinds of soil. Sensors react and select different programme cycles, depending on how dirty your plates are, optimising the consumption of energy, water and time.

6TH SENSE POWERCLEAN™

6TH SENSE PowerClean™ uses a redesigned system of targeted jet sprays to remove the toughest soil from pots, pans and extra-large items like baking trays, with no need for pre-washing, soaking or scrubbing. Special sensors detect how dirty the items in the PowerClean™ area are, regulating the water pressure accordingly and consuming no extra water.

PRE-WASH

Is a short cold-wash cycle (about 15min), you can use to pretreat your dishes before starting the complete washing cycle. Use in times when you're not washing each day and collecting dishes until you get a full load. This can eliminate smells/odours.

FRAGILE

Gentle wash dedicated to delicate items such as stemmed glasses. Using a light drying effect and a dedicated programme with the right temperature, you can load lightly soiled dishes such as glasses and cups.

RAPID

Is a quick washing cycle that washes your dishes in approximately 30 minutes and is meant for lightly soiled dishes. Use of detergent tablets is not recommended.

ECO

A cycle that keeps electricity and water consumption low, even with the full dry phase. Typically for normal and dried-on soil and max load.

SILENT PROGRAMME

The Silent programme is super quiet at only 39dBA, thanks to the modular water pressure system.

DAILY

Is a cycle that washes a mixed load with a medium soil level. With full drying effect. Fast programme with full cleaning and drying effect as alternative for ECO programme selection. For daily use of mixed customer load and normal soiled dishes with dried on soil.

INTENSIVE

Is a high-temperature washing cycle for heavily soiled items. With full drying effect, with heated pre-wash, for customer load with pots & pans, for baked-on, burnt-on, heavy soiled dishes.

STEAM

The steam option, gently penetrates food residues and eliminates difficult stains. With steam you can always be sure that your dishes are washed at the ideal temperature, no matter how dirty they are.

DUAL WASH

Is a cycle able to manage different wash intensities for each rack. You can optimize loading and properly wash different crockery in one cycle, loading delicate items in upper rack (with low pressure) and soiled pots and pans in the lower rack (with high pressure wash).

START DELAY OPTION

Choose by how many hours you would like to start the program.

SANI RINSE ANTI-BACTERIAL

Eliminates 99.999% of all bacteria (independently tested to NF EN 13697 standards), ensuring your dishes are fully sanitized.

WATER SAFETY SYSTEM.

- **Electronic aqua control:** Monitors the water level inside the dishwasher sump. In case of internal leakages, it stops the appliance and pumps out the water.
- **Waterstop safety system:** Anti-flooding device to protect your home. At the first sign of a problem, it stops the cycle, blocks the water supply and drains out the appliance.

SELF-CLEANING FILTER

A self-cleaning system regenerates water every 10 seconds and eliminates food particles through a "soak-and-pulse" action.

ALL-IN-ONE

Lets you choose your detergent according to preference and water hardness for optimum cleaning results with powder or any type of tablet.

LOAD MANAGEMENT

- **Half load:** The Half-Load option saves resources when washing a small load occupying both racks.
- **Multi zone:** Resource-efficient Multizone option lets you use only the upper rack or only the lower one.

SPACIOUS, FLEXIBLE RACKS

Modular racks can be repositioned or removed to suit your needs. Extra space is created by innovations like the 3rd rack and foldable tines.

FREESTANDING

ADP 9070 IX
freestanding dishwasher

POWERDRY TECHNOLOGY

Perfect drying, with no effort.

The PowerDry Technology achieves ultimate drying results thanks to its innovative 3D airflow system that extracts and drains away the steam from inside the dishwasher. Dishes and the dishwasher cavity are completely free from steam and humidity when you open the door. Take your glasses from the dishwasher and onto the table, with no need to towel dry, as they are spotlessly shiny. Even plastic items.

Thanks to PowerDry technology the 1 hour wash & dry programme ensures perfect cleaning and drying of all your dishes, including plastic items. When you unload the dishwasher there's no risk of any washed items dripping water onto your kitchen floor and no need to hand dry them before putting them away. That makes it the most convenient cycle on the market for your daily load of dishes.

Product Dimensions: HxWxD 850x597x590mm

- 1 The most robust sliding system with a deep extractable rack, for convenient and stable loading.
- 2 Removable 3rd rack.
- 3 Beautiful new stainless steel handles with improved ergonomics.
- 4 Telescopic guides.
- 5 Maximum flexibility thanks to tines that can all be folded.
- 6 Steel cavity.
- 7 PowerDry.
Innovative 3D airflow system that extracts steam and transforms it into water that drains away inside the cavity. No steam appears when you open the door.
- 8 PowerClean.
Intelligent sensors detect the level of soil and adjust the pressure of 28 jets sprays, no need to prewash.
- 9 Silent block.
- 10 Hinge balancing.

POWERCLEAN™

Say good-bye to soaking, scrubbing and rinsing by hand

With the unique PowerClean™, Whirlpool satisfies your desire for a dishwasher that can clean the toughest soil from pots, pans and even extra-large items like baking trays with no need for pre-washing, soaking or scrubbing. At the rear of the lower rack, rotating nozzles equipped with high-pressure jet sprays scour away heavy soil, without consuming any additional water.

SANI ANTI-BACTERIAL RINSE

Eliminates 99.999% of all bacteria (independently tested to NF EN 13697 standards), ensuring your dishes are fully sanitized.

Fabric Care

The clever 6TH SENSE technology is designed to preserve all colours as bright and beautiful as you bought them. And to intuitively select the most appropriate program, temperature, energy and time.

INNOVATION

The N°1 in washing, taking best care of garments and colours for a long lasting beauty.¹

The quietest motor on the market.²

Thanks to the ZENTechnology™, taking care of your garments has never been so silent. Spinning is extremely noiseless and you can turn the washer on even when you sleep. Long lasting performance and a motor guaranteed for a lifetime.

Customised drum movement.

The innovative SoftMove™ technology senses every load thanks to its unique **6TH SENSE** sensors, adapting speed and motion accordingly. The new ultra soft drum design offers the most gentle washing cycle ever.

Freshness for longer.

FreshCare™ technology gently tumbles your clothes after the cycle ends. Intermittent tumbling in the washer reduces wrinkles as well as odour causing bacteria.

¹ Testing among leading European brands conducted by Swiss independent institute EMPA Testmaterialien AG (Report Nr: 20120821) shows Whirlpool as the best in an accelerated garment aging test on half load in mixed programme 40°C or comparable (Status date January 2013).

² ZENTechnology™ has the lowest sound level on the market in spinning noise up to 10kg capacity and up to 1400 rpm (status December 2014).

The freshness of perfectly clean garments in an easy to load, **ultra silent** washer.

The special drum movement with innovative 6TH SENSE technology detects the load and adapts resource consumption, saving up to 50%¹ of water, energy and time. Get maximum care for your garments maintaining them as bright as new while enjoying unexpected savings.

ZEN TECHNOLOGY™

ZENTechnology™ means that caring for your garments has never been so peaceful and enjoyable. Washing and spinning are silent and you can even run your washing machine at night or during your daily zen downtime. The Supreme Care washing machine also features the quietest motor on the market.² The motor is connected directly to the drum, resulting in minimum vibrations and less noise.

PRECISIONDOSE™

By just using the right amount of detergent thanks to PrecisionDose™, you can optimise rinse performance. As part of 6TH SENSE technology, PrecisionDose™ dispenses the perfect amount of detergent and softener for up to 20 washing cycles. This way you can save up to 12L of detergent.³

PRECISIONCLEAN™

Ready, aim, clean. PrecisionClean™ is a unique technology based on the direct injection of water and detergent through a nozzle into the drum. The water jets penetrate deep into the garment fibres for more effective washing. This enables you to improve efficiency – with added care – and reduce the amount of water required. The same system makes rinsing also more efficient while remaining just as delicate on your clothes.

SENSEINVERTER MOTOR

To further ensure a long life for your washer a long lasting, extremely quiet and advanced electrical motor is installed at the heart of every machine.

¹ Comparison between max load and 1kg load in a washer with 6TH SENSE function on Cotton 60°.

² ZENTechnology™ has the lowest sound level on the market in spinning noise up to 7 kg capacity and up to 1200 rpm (status December 2014).

³ Compared to a traditional Whirlpool washer without PrecisionDose™ technology, at 4kg load per cycle with high concentrated detergent and medium level of dirt, considering an average family of four people.

FABRIC CARE • WASHING • GLOSSARY

6TH SENSE

Whirlpool's new washers are equipped with **6TH SENSE** technology for outstanding washing and rinsing results with improved resource optimization. Special sensors recognise the size of each load and resources are automatically adjusted to generate savings of up to 70%¹ on energy, water and time.

KEEPING YOUR COLOURS SPECTACULAR

For even better results, the Colours 15°C option can be combined with the unique set of **6TH SENSE** Colours programmes. Dedicated to different colour choices, these programmes ensure outstanding colour conservation and unparalleled fabric protection. Each **6TH SENSE** programme optimizes washing performance for a specific colour set, regardless of fabric type.

- **Dark Colours Programme:** protects your black and dark items from fading. 
- **Light Colours Programme:** washes light colours perfectly with no colour transfer. 
- **Mixed Programme:** optimized for a mix of fabrics. 

The set of **6TH SENSE** Colours programmes also includes a dedicated Whites programme for any fabric type, ensuring all your whites stay perfectly white over time.

SPECIFIC SAVINGS IN TUNE WITH YOUR NEEDS

Special programmes allow you to optimize use of energy, water or time depending on your specific requirements.

- **NightEco** programme: a super silent programme for a perfectly peaceful night. 
- **SuperEco** programme: offers energy savings of up to 30% on a full load. 
- **AquaEco** programme: optimizes the use of water to reduce consumption. 
- **Speed 15'** programme: washes lightly soiled garments in just 15 minutes. 

EFFECTIVE RINSING FOR TOTAL COMFORT

Whirlpool introduces a unique new Spray Rinse system for unbeatable rinsing results, perfect for people with sensitive skin. This active system sprays a high-pressure cone of water into the drum in two separate phases. During the first phase, the drum rotates at high speed and laundry is pushed to the sides while water enters the fibres, rinsing away most of the detergent. In the second phase, the drum speed is reduced to mix the laundry up and rinse it effectively. The process is repeated 4 times, resulting in perfect removal of detergent residues for outstanding, anti-allergic results.

NO MORE WASTED DETERGENT: SAVE UP TO 10 LITRES A YEAR¹

Whirlpool's **6TH SENSE** technology with Detergent Dosing recommendations suggests exactly how much detergent to use, helping you to save up to 10L of detergent a year¹ and protecting the environment. The recommendation is based on water hardness and soil level as well as load size, fabric and detergent type (powder or liquid).

¹ Based on Whirlpool internal field test, comparison with average user dosage based on 220 cycles per year. The saving is generated because dosing recommendation avoids overdosing.

CLEAN +

The special Clean+ cycle optimizes the effectiveness of each active agent in your stain solver, helping to get rid of tough stains even at low temperatures.

LED DISPLAY

Whirlpool's new washers boast a new user-friendly control panel with LED display, making them simple to use for everyone in the family.

AQUASTOP

To guarantee maximum protection against water leakage, these Whirlpool washers are equipped with an additional safety feature that immediately blocks the flow of water in case of leakage.

OUTSTANDING ENERGY EFFICIENCY

Offering "best in class" energy efficiency thanks to exclusive technology like the new ZenTechnology™ motor, Whirlpool's new 'A+++' washers consume 60% less energy than a standard 'A' Class appliance².

KEYBOARD CHILD LOCK

This locks the functions, preventing the danger of children altering functions or functions being altered during cleaning.

PERSONAL PROGRAMMES JUST FOR YOU

Whirlpool washing machines have the intelligence to evolve alongside your changing needs. With My Programme, you can store up to 9 customised programmes, which you can recall as and when required. Whirlpool's new washing machines ensure long lasting colour conservation and unparalleled fabric care, offering superb cleaning results even at ultra-low temperatures. All this is made possible by the unique combination of the special Colours 15°C option, **6TH SENSE** Colours technology and Wave Motion technology.

² With reference to the average energy consumption of a Whirlpool equivalent appliance in A class.

A+++

ABSOLUTE DESIGN

As well as outstanding performance, the Whirlpool Supreme Care washing machine and dryer feature an innovative design, with minimal and elegant lines shaping their simple and harmonious appearance. The displays are elegant, easy-to-use and intuitive in both the two perfectly matching masterpieces. So sophisticated is its design that the premium washing machine was honoured with the 2015 iF Design Award, a seal of excellence that recognises its outstanding design in the household category of its product discipline. Its progressive design makes your life simpler, firstly with a tilted console for easy reading and secondly with the **6TH SENSE** jewel designed to deliver easy and intuitive interaction for a single-handed control.

SOFTMOVE™

As you know, drying comes last but not least. To provide the finest care for all your garments, the dryer also incorporates SoftMove™ technology with a new ultra-gentle and intelligent drum design. The gentlest drying cycle ever keeps your garments crease-free and softer for longer.

FRESHCARE™

With FreshCare™ your garments will always stay fresh. If you cannot unload the washing machine straight away, FreshCare™ will keep garments fresh with continuous gentle drum movements until you have time to take them out.

The N°1 in drying,¹ taking best care of all garments' beauty, even wool.²

Ecomonitor.

Ecomonitor gives you the flexibility to choose the right settings so as to save the most energy.

Silence.

Thanks to the innovative heat pump, which is incredibly silent, your drying cycle will be as quiet as you have always wished.

The biggest drum on the market.³

Now you can dry even the biggest items thanks to capacity on this drum. The drum guarantees the best care for garments that will always be perfectly dried.

¹ Testing among leading European brands conducted by independent Swiss Institute Swisstatest Testmaterialien AG (Test Report Nr. 20130293) showed Whirlpool technology as the best in an accelerated garment aging test based on IFU-recommended load in mixed programme or comparable (Status August 2014).

² Testing among leading European brands conducted by independent Swiss Institute Swisstatest Testmaterialien AG (Test Report Nr. 20130292) showed Whirlpool technology as having the best drying performance in dryable wool based on IFU-recommended wool load size (Status August 2014).

³ In comparison with competitors in Heat-Pump Dryern market - 60x60cm dimensions (Status March 2014).

The **ultra** drying power of intelligent technology.

Whirpool's new dryers are fitted with the exclusive 6TH SENSE technology to ensure perfect, even drying and unbeatable resources efficiency. A new dual sensor detects the temperature and humidity levels of each load, automatically adapting drying time and energy use according to the level of moisture in each load.

ECOMONITOR

Full visibility on energy consumption and best optimisation of the cycle. A dedicated algorithm detects the consumption of the selected programme and load amount and is able to give feedback to the consumer about the overall energy consumption: it enables the consumer to have the flexibility to choose the right settings so as to save energy at best. Keep an eye on consumption, always.

A PROGRAMME FOR EVERY NEED

6TH SENSE dryers offer a range of programmes to satisfy every need. Whatever the load size or fabric type, intelligent **6TH SENSE** technology automatically determines the perfect drying program for each load.

- Baby Programme: dry delicate fibres such as baby garments, with total confidence.
- Delicate Plus: a new programme for fabrics carrying the symbol indicating extreme delicacy.
- Jeans Programme: optimised to ensure the best level of dryness for heavy-fibre jeans.
- Big Items Programme: dry large items like pillows and quilts evenly and thoroughly.
- Soft Finish Programme: restore the natural texture and softness of woollen clothes.

LARGE ITEMS, LESS ENERGY

Making a bigger drum more efficient is no small feat. The extra large drums, that go from 7 to 9 kg loads, allow you to dry more washes at one time, saving you time and energy. Not only we offer the largest drum in the heat pump dryer market, we also provide a special large item programme that allows for the specific drying of heavy or bulky items. No load will be too big to dry.

DRUM PATTERN

Our state of the art drums have been designed to reduce friction between the clothes and the surface of the drum. While still ensuring your garments will tumble sufficiently to dry perfectly, the surface finish does not in any way cause even the minimal wear of the fibres, ensuring an even longer life to your favourite clothes.

6TH SENSE TECHNOLOGY

Whirlpool's new dryers are fitted with exclusive **6TH SENSE** technology to ensure perfect, even drying and unbeatable resource efficiency. A new Dual Sensor senses the temperature and humidity inside the drum, automatically adapting drying time and energy according to the level of moisture in each load.

A PROGRAMME FOR EVERY NEED

6TH SENSE dryers offer a range of programmes to satisfy every need. Whatever the load size or fabric type, intelligent **6TH SENSE** technology automatically determines the perfect drying programme for each load.

- **Delicate Plus:** A new programme for fabrics carrying the symbol indicating extreme delicacy. 
- **Jeans Programme:** Optimized to ensure the best level of dryness for heavy-fibre jeans. 
- **Silk Programme:** Dry up to 1.5kg of delicate silk items safely, at very low temperatures. 
- **Sport Programme:** Perfect for drying delicate or mixed fibre sportswear garments. 
- **Big Items Programme:** Dry large items like pillows and quilts evenly and thoroughly. 

Whirlpool dryers are equipped with numerous intelligent features to make your life simpler, like the Cycle End function. It lets you choose the precise time you want the drying cycle to finish. So at the selected time, your laundry will be waiting for you: soft, warm, wrinkle-free and easy to iron.

LCD DISPLAY WITH ECO MONITOR

Whirlpool dryers are designed to enhance your home and improve your daily routine. The large LCD display makes programming simple and feedback easy to see, while the Eco Monitor function helps you satisfy your green goals by providing full visibility on energy consumption.

START DELAY

Set your drying programme to begin when it's most convenient or advantageous - for example, at night. The timer can delay a programme start for up to 24 hours.

CHILD LOCK

This locks the functions, preventing the danger of children altering functions or functions being altered during cleaning.

A BIGGER CAPACITY TO CARE FOR YOUR LAUNDRY

The **6TH SENSE** dryer gives your laundry more space to dry evenly and without creasing and saves energy by letting you dry more laundry in fewer cycles.

The extra-large drum is also perfect for washing the kind of bulky items that ordinary dryers cannot accommodate. With the dedicated Big Items programme, you can be sure they'll be dried thoroughly and evenly.

CONDENSER DRYER

AZB 9100 SL
AZB 9100 WH
freestanding dryer

- **6TH SENSE**
- 9Kg Drying capacity
- 14 Drying programmes
- 'B' Energy efficiency
- 'B' Condensation efficiency class
- Various options (see "Help me choose")
- Anti-crease function
- Reverse tumble action
- Digital display
- LED indicators (see "Help me choose")
- Dial & button control
- Internal drum light
- Diagonal airflow system
- Moisture monitoring system
- Over-dry protection system
- 5L Removable water bottle
- Clean heat exchanger

CYCLE END

The handy Cycle End function lets you choose the precise time you want the drying cycle to finish, especially useful when you want to delay the cycle's start. So at the selected time, you know your laundry will be waiting for you, freshly dried and in perfect conditions.

DRUM CAPACITY

The bigger the better. Extra large drums, that go from 7 to 10 kg loads, allow you to dry more loads in one go, saving you time and energy. And a special large items programme allows the specific drying of heavy or bulky pieces.

Warranty Exceptions

Conditions and damages resulting from any of the following cases:

- Improper installation, delivery or maintenance (i.e., pump filter cleaning);
- Any repair, modification, alteration, or adjustment not authorised by the Manufacturer;
- Misuse, abuse, accidents or unreasonable use;
- Incorrect electric current, voltage or supply;
- Damages due to voltage peaks or lightning;
- Improper settings of any control;
- Product previously repaired by non-authorized Service Partner.

Damage on aesthetic components due to transport and movement (i.e., dents, scratches) are not covered by warranty.

Aesthetic components (i.e., handles, lamps, glass, plastics).

Light bulbs, water filter, air filter, carbon filter, rubber hoses.

Accessories and glass made optional (i.e., shelves, plates).

Products used for non-domestic purpose or located in commercial environment (i.e., restaurants, hotels, hairdressers, laundry shops, butcher shops and garage).

Installation cost (i.e., water, power and gas connection).

Where a product has been returned due to incorrect information furnished by the dealer regarding the features and use of the product.

Assistance or service call to:

- Correct any improper installation;
- Instruct the consumer on proper product usage;
- Transport appliance to the service workshop;
- "Door reversibility";
- No failure found (in case of functional failures claimed by the consumer and not found during technician check, the repair will be charged to the consumer);
- Periodic maintenance or the cleaning of water filter, pump filter and air duct filter;
- Removal of transport support or fixation screws;
- Settle of feet and setting of gas nozzles.

Cost of the above-mentioned service call has to be charged to the consumer.

WPRO • CLEANING ACCESSORIES • SUMMARY

WPRO: PRODUCT OFFERING

NEW UNIVERSAL STACKING KIT WITH SLIDE OUT SHELF

- Quick and easy to install, the new Wpro Universal Tower Kit stabilizes your tumble dryer above your washing machine in complete safety thanks to its "Safe-in-Lock" device.
- Practical, with its sliding shelf, you can load and unload your tumble dryer without bending or use it to fold your washing.
- It's universal and fits all 60 x 60 cm appliances.

DESCALER FOR DISHWASHER AND WASHING MACHINE

- Eliminates lime scale deposits.
- Optimizes performance and prolongs the life of the appliances.
- De-scaling is recommended every 6 months.
- Formula approved by the professionals and 99% biodegradable.

SHOCK ABSORBER (X 4)

- 4 shock absorbing pads, to avoid the vibrations caused by the friction of your household appliances on the floor.
- Protects your wooden floors and tiles from scratches.
- Fits all domestic appliances.

MAGNETIC WATER CONDITIONER WASHING & DISHWASHING

- Prevents the formation of lime scale and prolongs the life of the appliances.
- It is installed on the inlet hose of the appliance.

"GOODBYE ODOURS" ABSORBER BEAR

- Stops all unpleasant odours in the fridge.
- Active "2 in 1" formula: active carbon and gel with replacement indicator.
- It can be placed in the egg compartment.
- Conforms to food standards: does not alter the taste or the smell of food.
- Lasts about 3 months.

ANTIBACTERIAL FILTER

- Whirlpool together with Microban®, the market leader in antibacterial solution, has developed an antibacterial air filtration system.
- The antibacterial filter incorporates state-of-the-art technology to help reduce unpleasant odours in your appliance.
- This hygienic filter treated with Microban® helps trap and kill airborne micro-organisms caught within it.
- It keeps working for the full life of your filter – about 6 months – after which the filter is easily replaced.

US REFILL & WHIRLPOOL REFILL CARTRIDGE

- Universal for refrigerators with in-line filtration.
- Delivered with 2 clamp collars.
- 5580 litres capacity
- 6 months of use
- Whirlpool Cartridge 1 clamp for internal Adaptable for the following range of appliances:
- Samsung (EF9603/WSF100)
- LG (BL9808/BL9303)
- General Electric (GXRT QR)

VITRO CERAMIC CLEANING KITS

- A complete cleaning kit, which consists of a professional cream (250ml), 10 stainless steel blades and a scraper that cleans and preserves a glossy finish on Vitro Ceramic, Induction and Glass hobs.
- There is no risk of scratching the surface of the hob.

DE LUXE INTERFACE DISC FOR INDUCTION HOBS 22 & 26CM

- **ECONOMICAL:** the Wpro interface disc for induction hobs allows you to keep your traditional pots and pans while cooking: aluminium and stainless steel.
- **UNIQUE:** for safety, the thermo chromic logo in the middle becomes red while the disc is still hot.
- **PRACTICAL:** with detachable handle, easier to use and easier to store.
- **ERGONOMIC:** the silicone handle allows a better grip diameter of 22 cm to use with your 22 to 32cm diameter cookware.

NATURAL FIBRE GREASE & CARBON FILTER 350g/m³

- Universal combi-filter suitable for hoods without an external exhaust.
- Eco-friendly, made from a combination of natural flax fibres and active carbon fibres, bound together by a natural corn base.
- Double-sided: one side anti-grease + one side anti-odour. The anti-grease side is protected with a fireproof natural treatment (sodium silicate based).
- More absorbing power than standard polyester filters.

UNIVERSAL FILTER WITH SATURATION INDICATOR X 2 (470 X 970MM 140 GR/MQ X1)

- This universal filter allows you to protect the kitchen from grease vapours spreading while cooking.
- Thanks to its saturation indicator, when it is time to replace the filter, the indicator colour changes.

ECO-FRIENDLY COOKING, OVEN AND MICROWAVE CLEANER 500ML

- Professional solution to thoroughly eliminate greasy deposits and undesirable odours within your kitchen, oven and microwave.
- It can be used both inside and outside your appliance.
- The cleaner incorporates a deodorizing formula.
- ECO-LABEL certified.

ECO FRIENDLY VITRO CLEANING AND POLISHING CREAM 250ML

- Exclusive formula to effectively clean induction, glass ceramic and glass hobs.
- It also safeguards your appliances by leaving a protective film without scratching.

COFFEE MACHINE DESCALER

- Effectively removes lime scale deposits.
- Restores the machine's optimum performance and prolongs its life.
- Universal for all types of coffee machines.
- Performing formula, not aggressive on stainless steel & aluminium.
- Also suitable for de-scaling containers with lime scale stains: casserole dishes, vases.

IRON DESCALER

- Eliminates all lime scale deposits and makes ironing easier.
- It restores the iron's original performance and prolongs its life.
- Suitable for irons with aluminum sole plates.

AIR CONDITIONER SPRAY CLEANER AND DEODORANT 500ML

- The Wpro new formula effectively cleans the filter and eliminates unpleasant odours in the cooling circuits of the air conditioning system leaving a fresh fragrance.
